

CS 300 WALK THROUGH METAL DETECTOR

- 1、 [Waterproof design]: Full waterproof design, can be completely open air work, waterproof grade reached IP55.
- 2、 [Detection accuracy]: Security gate sensitivity is much higher than the national standard, The highest sensitivity can be detected a steel one dime coins, you can also exclude belt buckle, leather shoes, bra, etc., to detect large metal or control tools and guns, etc.。
- 3、 [LED display panel]: High brightness LED widescreen display, Standby status display through the number and the number of alarm, debugging status as the output device shows the technical parameters of the security gate。
- 4、 [Door body material]: Security door body is made of ABS plastic, the door body is not deformed, moisture, durable, beautiful and generous.。
- 5、 [Alarm mode]: 6 binary detection location can also sound and light alarm to accurately display the location where the contraband.。
- 6、 [Strong confidentiality]: Security door technical parameters are waterproof PVC button control, and a password protection, so that non authorized personnel cannot operate, enhance system security.。
- 7、 Power interface: The use of waterproof power interface
- 8、 [Harmless to the human body]: In line with the National Health Department of health standards, the heart of the wearer, pregnant women, magnetic media, etc...
- 9、 Convenient installation: Security door is an integrated design, 5 minutes to install or remove, random with the installation instructions.
- 10、 Weight: ≤25kg
- 11、 External power supply: 215V - 230V 50/60Hz
- 12、 Power waste: ≤25W, Ultra-low power consumption, low radiation
- 13、 work environment: -20°C–55°C
- 14、 working frequency: 8 segment frequency optional
- 15、 Outline dimension: (cm) 226(High) x 86(Wide) x 27(Deep)
- 16、 Channel size: (cm) 196(High) x 70 (Wide) x 27(Deep)
