

MCD 300 WALK THROUGH METAL DETECTOR

Parameters of MCD-300 walk through metal detectors

Item	detail
Detection zone	6
Sensitivity	0-99 adjustable
Alarm way	Audio alarm and LED location lamp work at the same time
Display	8 status led display
Pass rate	>40 persons/min
Power	220V AC,50/60Hz
Power wastage	35w
Working temperature	-10°C-45°C,≤95%RH
Tunnel size	200(L)*70(W)*56(H) cm
Dimension	222(L)*82(W)*67(H) cm
Net weight	60kg/set
Gross weight	70.5kg/set

Details of our sensitive MCD-300 walk through metal detectors

Item	Detail
Brand and type	MCD-300
Features	<p>1.Economical,practical,cheap,wateproof 2.Can match moderate detection requirement 3.Six interlaced detection regions of the same high with the body and combining 4.Four pairs of infraced emission and the receiver to prevent detection blind spot 5.LED array panel on the operation board display the area of metal detected 6.Sensitivity of every area can be adjusted independently from 0-99,getting rid of interference of scheduled metal 7.Strong anti-interference:digital and analog circuit design to prevent wrong alarm 8.Password protection function:just allowing authorized personnel to operate equipment in order to insure security 9.Function of several detection doors work at the same location at the same time, the minimum distance between each door must be more than 40 certimeter 10.100 grade sensitivity,exclude the interference of belt,key,jewlery and coin and so on</p>
Detected goods	metal tools,weapons,electronic products and so on
Application area	factory,exhibition,outdoor check,large public events or others
